Mr. Chris Brown
6267 Castille Court
Orleans, Ontario
K1C 1X4

Ta 6th

Dear Mr. Brown:

Recently it has been brought to my attention that you had telephoned the Department expressing concern about staff members in the Health Services and Promotion Branch and discussions about environmental sensitivities.

The Health Services and Promotion Branch regards this area as important and has been working on it for some time with the Laboratory Centre for Disease Control (L.C.D.C.) in the Health Protection Branch. L.C.D.C. has the lead role in Health and Welfare Canada and all other departmental activities are coordinated accordingly in a support role. A number of important research oriented activities have been undertaken in L.C.D.C., the results of which are not yet available. My Branch staff are continually kept informed of progress in this area.

When results of interest to you are available, I am certain these can be provided to you. Meanwhile, should you have any further questions, please feel free to contact Ms. Barbara Ouellet, Acting Director General, Health Services Directorate, in my Branch at 954-8630.

Yours sincerely,

Amelita A. Armit
Assistant Deputy Minister
